Subject: Request for participatory budgeting data - Budapest

Nieczęsto otrzymujesz wiadomości e-mail z adresu [REDACTED] [Dowiedz się, dlaczego jest to ważne](#)

Üdvözlöm, ez a rövid sor gépi fordítás. A fő üzenetet angolul küldöm, mert ezen az idegen nyelven tudok közvetlenül kommunikálni; ha szeretnék, szívesen készítek teljes magyar nyelvű változatot is.

Hello,

On behalf of Jagiellonian University in Krakow, Poland, we maintain a public dataset of participatory budgeting elections at <https://pabulib.org/>.

We are writing with a polite request to share data from the voting held until 30 September 2025 in the fifth cycle of Budapest's participatory budgeting.

We would be very grateful for:

- a list of projects (identifier, title, cost, category, location, number of votes, outcome)
- an anonymized vote-level dataset (anonymous voter identifier, cast vote / points, age, sex/gender, district or neighborhood, and whether the vote was cast online or on paper, if available)

We already have older data from Budapest on our website, and we would be very happy to complement the collection with the most recent completed citywide vote.

The most convenient format is csv or xlsx, but we are happy to adapt to the format you already have. We use the data only for academic and research purposes.

Kind regards,

Pabulib | QuantPol
